Introduction

Best Free Keylogger is a PC monitoring utility that works totally invisibly in your computer. This software can monitor keystrokes; Chat, Internet activity, Visited URL, Clipboard text copy, File copy monitoring and also can take screenshots for previously setup schedule task. This software is the best solution to monitor what children are doing with their computers when parents are not available at home or else can monitor the employee's duty whether they are doing that properly or not with the computer.

This software is totally invisible and only user who installed this software in to the computer can see it. The attractive user friendly interface provides user to collect data easily. User can simply coordinate and control this software and also can do filtering to get the necessary data. Thumbnail or full screen mode can use specially to see the screen shots and also slide show feature helps to simplify the screenshots.

Time scheduling task is available to activate this software for a particular time period and can activate only selected user accounts. Also it can enable or disable in selected applications, automatically remove early data and automatically uninstall by itself for the previously scheduled time are the advanced features available in this software.

Best Free Keylogger supports for the methods to monitor data from another computer. It can automatically upload in to the FTP host and Emailed to the previously scheduled time frame. In a network it can automatically transfer data to the main computer. It has a USB delivery system and when it connects to the computer it automatically starts to transfer reports to it. (USB device must previously configured with the software)

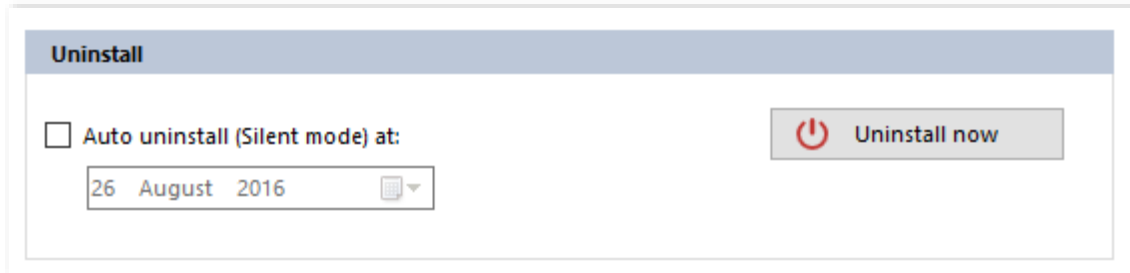

Installing

1. Open the installer (installer.exe).
2. Read through the **License Agreement** before continuing. (To continue setup you will be required to agree to the License Agreement).
3. The next window will ask you about file destinations. (We recommend using the default location)
4. Select **Finish**.

Uninstalling

1. Unhide Best Free Keylogger
2. Go to **Settings > General Settings**.
3. Click **Uninstall Now** button.

Upgrade to Pro

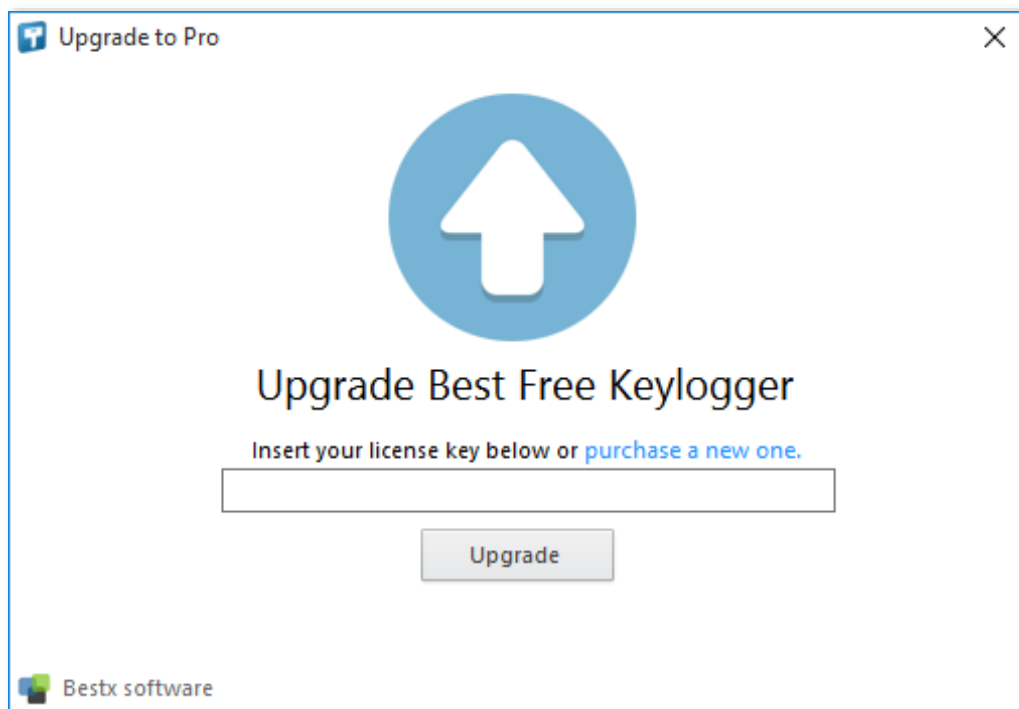

After the purchase, you will receive a license key immediately via Email.

Click **Upgrade to Pro** button on the toolbar.

Enter your name and license key in the registration dialog.

Please don't mix 0 (zero) and O (ou), I (ai) and 1 (one) while typing your license key in the registration dialog.
